# The MGS-19

**Sight For 40mm Automatic Grenade Launchers  
with Wide Field of View.**

- The MGS-19 is designed for a 40mm AGL and to provides pinpoint accuracy which ensures that every round is on target, suppressing enemy fire faster, reducing collateral damage and drastically reducing ammunition consumption.
- Developed to provide a more natural and comfortable shooting position by bringing the sight closer to the center of the barrel.
- The MGS-19 is the third Generation Crew Served Weapon sight offering a very large field of view with an unequalled 80 x 50 mm lens that provides rapid acquisition and tracking of stationary and moving targets.
- Multiple rails (3) included for mounting optional magnifiers, video cameras, lasers for night aiming /illuminating, non-lethal escalation of force lasers, thermal sensors or other devices.

## •The MGS-19 consists of :

- The Mk19 Mount (2 Axis)  
(Sight Bracket Interface needed)
- The MGS+ with a very large FOV
- Multiple rails for mounting accessories
- Optional: Magnifiers and thermal weapon sight

MGS+M1X

Mk19-MT

Option: MMG-3X-MT

## •Benefits:

- Accurate -2 Axis design
  - Range Adjustment with BDC from 200-1500 m
  - Spin drift compensation
- Easy to operate with a BDC Dial –Just press and rotate to select a range
- Rugged/Compact design/Light weight
- Easy to install using the standard Sight Bracket Interface
- Quick access to the Iron Sight-Backup
- Developed to provide very comfortable shooting position.

## The MGS-19 Specifications

### FEATURE

Range selection  
Spin drift compensation  
Picatinny rail  
  
Material  
Weight  
Dimension

### DATA
